holds.

Our holds are made of **eco-friendly polyurethan** that contains up to **40%** raw materials from **renewable resources** and which is certified as a **carbon neutral product**. The holds have a high durability due to a very high abrasion resistance, impact strength and **state-of-the-art production processes**.

All holds are **carefully designed** to fulfill the requirements of modern routesetting. Our **aesthetic holds** offer a variety of possibilities for routesetters to create thrilling routes and boulders not only for beginners, but also for experienced climbers. All our products are **handmade in Karlsruhe, Germany**.

Dragonfly.

The “dragonfly” is one of the oldest insects on earth. It has been adapting to different habitats and environmental conditions for over 250 million years. This ability to optimize and their progression inspired us while developing our first climbing hold set.
